

The main our purpose of this report is to give and overview of the changes for a florida's forum.

SEO friendly in a URL .

Nowadays if you enter in florida's website you can see the routes of the url. I think its not a good practice because the client shoudn't see this direction. Its annoying and they don't like this. Florida is made with php language and its more easy to route.

Florida social media and servers.

Sometimes and thanks for the covid, the people has develoup a new behaviors to be alone and don't make relationship with the people. Florida should develop a new social media to begin new relationships.

The floridas server always are disconnect and his students can't do the works. Florida need change his servers andput more secure in his accounts. His page is pretty and use a monocromatic color's, but in his styles doesn't be a suited in best school forums.

The main are of concern amoung are the students and teachers to make new task and haven't suffer errors.

Regards
